GUIDE

1 What this sheet practises

Reading a month calendar to find the day of a date, the date of a given day, how many of a weekday, and a week later; and counting on through the days of the week.

2 A problem from the sheet, worked out

Days of the week Count on through the week. After Saturday comes Sunday.

Today is Friday. What day is it in 2 days?

Saturday **Sunday** Monday

Today is Saturday. What day is it in 3 days?

Friday **Tuesday** Sunday

Today is Wednesday. What day is it in 3 days?

Thursday **Saturday** Tuesday

How: Find the date in the grid and look up to the top of its column for the day. A week later is the same column, one row down: add 7.

3 Words to know

calendar a chart of the days in a month

date the number of a day in the month

week seven days, one row of the calendar

weekday a day name, Sunday to Saturday

4 Watch for

- Starting the count from the first column instead of the 1st.
- Forgetting that after Saturday comes Sunday.
- Adding 1 instead of 7 for a week later.

5 Where it fits

BEFORE

1.MD.B.3

Tell and write time to the hour and half hour.

THIS SHEET

1.MG.3

Tell time to the hour and half hour, and use a calendar to find days and dates.

NEXT

2.MD.C.7

Tell and write time to the nearest five minutes, using a.m. and p.m.

6 Helping at home

Mark birthdays and holidays on a wall calendar and ask what day each falls on, and what date is a week later.
