GUIDE

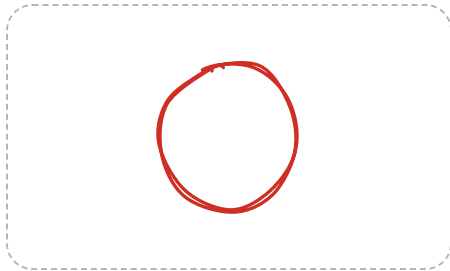

① What this sheet practises

Drawing shapes from their names or from clues, like 3 sides and 3 corners, in different sizes.

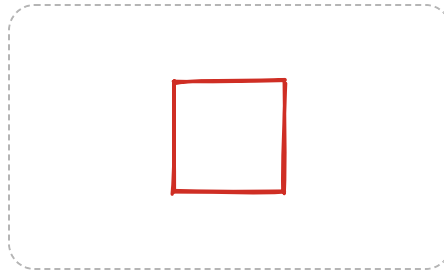

② A problem from the sheet, worked out

Draw it Draw each shape in its box.

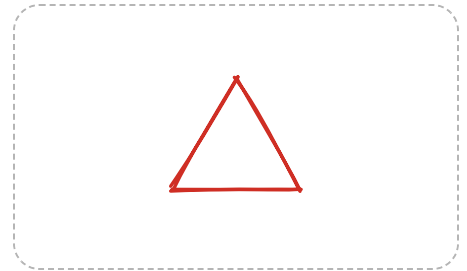

a circle

a square

a triangle

How: Think about what makes the shape: how many sides and corners, straight or round. Draw it, then count the sides and corners to check.

③ Words to know

side a straight line in a shape

corner where two sides meet

closed no gaps: the lines all join up

rectangle 4 sides and 4 square corners

④ Watch for

- Leaving a gap, so the lines don't join up.
- Adding an extra side, so a 3-sides clue gets 4.
- Drawing the big and the small shape the same size.

⑤ Where it fits

THIS SHEET

K.G.B.5

Build and draw shapes.

NEXT

1.G.A.1

Tell which features make a shape what it is, then build and draw shapes.

⑥ Helping at home

Make shapes with straws, craft sticks or string, then draw them. Ask how many sides and corners each one has.
