GUIDE

1 What this sheet practises

Telling flat shapes, like a drawn square, from solid shapes you could hold, like a block or a ball, and naming both kinds.

2 A problem from the sheet, worked out

Solid shapes Circle the shapes you could pick up and hold, like a block or a ball.

How: Ask: could I pick it up and hold it, or is it flat like a drawing? Solid shapes are drawn looking thick. A cube is solid; a square is flat.

3 Words to know

flat lies on paper, like a drawing

solid can be picked up and held

cube a solid shape like a block

sphere a solid round shape, like a ball

4 Watch for

- Calling a cube a square, or a ball a circle.
- Thinking a picture of a block is flat because it's on paper.
- Choosing by color or size instead of whether it could be held.

5 Where it fits

THIS SHEET

K.G.A.3

Tell flat shapes from solid shapes.

NEXT

K.G.B.4

Compare flat and solid shapes by their sides, corners and faces.

6 Helping at home

Collect a box, a can, a ball and a sheet of paper. Sort them into solid and flat, then trace around the box to draw a flat shape.
