GUIDE

## 1 What this sheet practises

Making picture graphs from things counted, and reading them: how many, which has the most or fewest, and how many more.

## 2 A problem from the sheet, worked out

**Read the graph** Count the pictures in each row.

Each picture means 1.

**How:** Put one picture in a row for each thing, starting at the same edge. Longer rows mean more.

## 3 Words to know

**graph** a picture that shows how many

**row** things side by side in a line

**most** the biggest number

**fewest** the smallest number

## 4 Watch for

- Drawing pictures of different sizes, so a short row looks long.
- Skipping a thing, or drawing it twice.
- Picking the row with the biggest pictures as the most.

## 5 Where it fits

BEFORE

**K.MD.B.3**

Sort objects into groups and count each group.

THIS SHEET

**K.8B**

Make real-object graphs and picture graphs from data.

NEXT

**1.MD.C.4**

Sort, show and read data with up to three categories.

## 6 Helping at home

Sort the toys or socks into kinds, line each kind up in a row, and ask which has the most and how many more.
