GUIDE

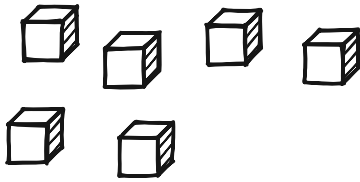

1 What this sheet practises

Sharing a set of objects fairly among friends, so each gets the same number, and telling whether a share is fair.

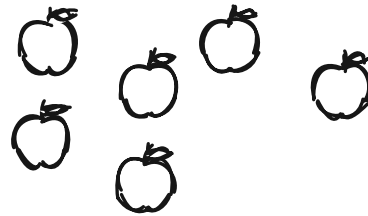

2 A problem from the sheet, worked out

Share them fairly

Give one to each friend, then another, until none are left. How many does each friend get?

3 friends: each gets **2**

2 friends: each gets **3**

How: Deal them out like cards: one to each friend, then another to each, until none are left. Then count one friend's pile.

3 Words to know

share give some to each person

fair everyone gets the same number

each every one of the friends

equal the same amount

4 Watch for

- Giving one friend extra and stopping when the others are short.
- Counting all the objects instead of one friend's share.
- Calling a share fair when the numbers are close but not the same.

5 Where it fits

BEFORE

K.CC.B.5

Count up to 20 objects in a line or a group, and count out a given number.

THIS SHEET

K.N.3.1

Share a set of objects fairly into two or more equal groups.

NEXT

2.OA.C.4

Use repeated addition to count objects in rows and columns.

6 Helping at home

Share a snack between family members by dealing it out one at a time. Ask: did everyone get the same?
